PR9.NET August 24, 2006 - Nicosia, Cyprus – Welcomed to the world as one of the best music editor software, Music Morpher Gold has been recently updated to the latest build 3.0.18 which supports you better than ever in turning a Pop song into a Rock song. Detailed guidelines can be found at <http://www.musicmorpher.com/free-tutorials-project7.htm>

Thanks to the non-stop artistic job of the AVnex's Lab Team, Music Morpher Gold is now considered as snappy home audio editing software that provides users a wide range of performances such as voice removing, voice extracting, cover editing, wave editing, grabbing, burning, music morphing, etc. Moreover, the latest adjustments in its new build 3.0.18 are Wave Editor setting and Effects Library that serve all the music fans very well in rocking songs.

With these following simple steps then users can turn your Pop songs into Rock songs easily. Firstly, they have to activate the Wave Editor function and improve the quality of your audio file by adjusting the Equalizer bar. Secondly, open Effects Library and choose Voice Morphing. Then, they can click on Tempo Morphing to call for the Tempo Morpher Dialog to change the song speed. Music Morpher Gold members can also add the beat tracking into their songs to make them real "rock" music.

This better function of new build 3.0.18 is a promptly feedback from Avnex Lab Team after the promotion week for DJs - "Rock you in the Music World" at the end of June. In that week, many fabulous offers such as free software, coupons were presented to DJ worldwide so that they can activate their creative competence in the music world. Not long after, Music Morpher Center has received many good comments and some suggestions to give them more opportunities in rocking their favorite songs. People don't need to have any instrument but Music Morpher Gold to rock any song overzealously.
