*Encodex Technologies delivers the best of Offshore Software Development and Outsourcing Services - we bring highest quality of offshore software development capabilities.*

PR9.NET September 14, 2006 - Portland, Oregon - Encodex Technologies, A Microsoft Gold Certified Partner is a Global Software Development and Information Technology outsourcing company, providing offshore outsourcing solutions to enterprises worldwide.

Based on principal experiences of software and application development in Microsoft Technologies, Encodex Technologies was established to develop Customized software solutions and Enterprise Content Management System. In the past 5 years Encodex technologies has achieved extensive experience leading to a superior team of brilliant IT professionals, matured processes, constant communication methodologies, quality project management, perfect deployment capabilities and world class infrastructure.

Mr. Arun Joshi, CEO & Founder of Encodex Technologies said, "We have achieved multiple milestones during this tenure of 5 years. Encodex is also certified with a Microsoft GOLD Partner status this year. We have identified few areas where Encodex can add value:

- Design and Development of Cost Effective Enterprise-level Web Applications.
- Creating Custom Applications on .NET Platform.
- Creating New Business Application from Scratch.
- Migration of Current Application to .NET Platform.
- Development of Enterprise Content Management System on .Net Open Source Platform.

We have Core Competencies in a number of areas, including:

Microsoft .Net Application Development, Application Migrations Solutions, Database Migration Document Management Systems, Web Portal Solutions, Content Management Systems, SharePoint Server Portal, BizTalk Server 2004 and Commerce Server 2002"

"We've geared up to provide access to talented people with strong software engineering experience and who operate at the cutting edge," says Arun. "Our engineers can absorb new technology quickly and use it to deliver solutions. By continually transferring knowledge and best practices to our clients, we enable them to keep up with the accelerating pace of information technology without exhausting their resources."

###
