Digital Warehouse USA, Inc., a leading global supplier of pre-owned products and services that reduce the total cost of network infrastructure, has received the Certificate of Registration by Perry Johnson Registrars, Inc. for conformance to the ISO 9001:2000 international standard.

PR9.NET September 20, 2006 - New York, NY -- Digital Warehouse USA, Inc. today announced that it has been issued a Certificate of Registration by Perry Johnson Registrars, Inc., an independent ISO registrar, for conformance to the ISO 9001:2000 international standard. Recognized worldwide as a hallmark of total quality management, the Certificate identifies Digital Warehouse as a company with a consistently applied system of quality standards and procedures.

"In refurbishing and remarketing pre-owned network infrastructure equipment, ISO 9001:2000 certification is an invaluable asset," said Joe Asady, CEO of Digital Warehouse USA, Inc. "It tells our customers that they can depend on us to exercise the utmost vigilance in every aspect of our various business processes. It is the approval of our Total Quality Management System, and we take tremendous pride in this achievement."

The company's leading quality management systems, robust customer service management processes, and new employee orientation were all cited as examples of the company's outstanding operational protocols.

Having achieved certification, Digital Warehouse will now undergo regular surveillance audits from the Registrar every six months.

The most comprehensive of the ISO standards, ISO 9001:2000 is a model for quality assurance in design, development, production, installation and servicing which has been adopted as a national standard by more than 80 countries.

Perry Johnson Registrars Inc. is an independent registrar accredited by the UKAS, RVA, ANAB, ANSI-RAB, JAB, TGA, KBA, INMETRO, and SINCERT organizations. The ISO standard is sponsored by the International Organization for Standardization, which describes today's international marketplace as "a world in which global trade between nations continues to grow at a rate three to four times faster than national economies; a world in which the design, manufacturing, marketing, and customer service operations of a growing majority of individual enterprises are distributed across many countries; and a world in which electronic communications have dramatically increased technical collaboration between experts in academia, governments, and industries from all countries."
