TeachMeIT, a leading provider of online courses in IT and desktop applications, has proudly announced the launch of Online Life Science Course Portal (<http://lifescience.teachmeit.com>).

PR9.NET September 27, 2006 - New Jersey, US: TeachMeIT, a leading provider of online courses in IT and desktop applications, has proudly announced the launch of Online Life Science Course Portal (<http://lifescience.teachmeit.com>). The portal offers an Life Science course catalog, developed by a CME Category 1- accredited organization, focused exclusively on Life Science education for healthcare professionals as well as for companies including pharmaceutical, biotechnology, instrument, lab suppliers, healthcare and also for Patient Education.

With over 200 courses, Life Science online library is divided into three disciplines – Therapeutic, Biotechpharmaceutical Technology and Regulatory and Compliance. The Therapeutic Catalog suite contains the top 40 disease states, and eight of the top ten Therapeutic Areas have been researched by all of the major pharmaceutical and biotechnology companies. A comprehensive Anatomy and Physiology (A&P) catalog suite explores the fundamental of these key Therapeutic Areas.

The Biopharmaceutical Technology course catalog covers a wide range of topics, from Biopharma Basics to Biopharma Applications, from Human Gene Therapy to Computer Assisted Drug Design, and from Bioinformatics to Microarray Informatics. The Regulatory and Compliance (GxP) elearning Curriculum includes Introduction to GxP, GLP, GMP, and GCP, among many other key courses.

Developed in partnership with GeneEd, the courses offer the expertise and the technology that enable healthcare professionals and companies to enhance their effectiveness. Moreover, interest in various products and treatments offered by healthcare organization, rises with greater awareness of the related disease state. TeachMeIT provides rapid and convenient access to material that healthcare providers can leverage to increase customer interest.

All Life science courses in the repository are developed using of the latest technology and expertise. Each course is SCORM 1.2 compliant and has been successfully integrated with 21 CFR Part 11 compliant LMS applications. In addition, all elearning content is developed in learning object methodology and delivers simple integration, and more granular levels of tracking of elearning content within an organization's LMS.

These courses are a benefit not only to large healthcare companies, but also to the physicians treating particular disease states, who must decide among available treatment options.

The courses in the catalog can be accessed anywhere and anytime. Each course is 2-4 hours in duration, incorporating compelling animations, voiceovers, progress checks, interactive exercises and a final assessment. The courses are also equipped with a full transcript, 800+ term glossary and related industry links.
