*Mobile Broadcasting Corp. (MBC) <http://www.mbc.tc> is making must see TV News a thing of the past, as user-created-content-journalist are taking the place of how people get their news and who they get it from.*

PR9.NET October 17, 2006 - Los Angeles, CA Who will be the next big journalist to break the news? One thing is for sure, in this generation, the big broadcasting companies will now have to compete with the likes of anyone with a mobile phone, who happens to be at the right place at the right time. If its a catastrophe, the wrong place at the wrong time.

Breaking down the coveted barriers of press credentials and high paying media jobs are now a thing of the past as MBC Mobile Media will instantly credential people to cover and attend their favorite events, meet their favorite celebrities while covering an event by sending their video footage to MBC Mobile Media.

After signing up, a list of assignments will be made available to choose from. Press credentials will be sent immediately for your entry. If you happen to already be at an event, simply upload your video. Instantly, your images and clips are sent to 4 billion people through a global mobile file sharing application.

All ages are welcome to apply for becoming part of the MBC Mobile Media team of "user-created-content journalist's" while gaining experience, and being seen by millions of people from around the world on your cell phone's.

MBC will replace the likes of Fox News, BBC News, Sky News, MSNBC News, Reuters, Associated Press, and CNN.

Be a part of MBC at <http://www.mbc.tc>

###

## About Mobile Broadcasting Corp

A free mobile phone service that is carrier-independent and easy to use. MBC offers global coverage, from disaster coverage, conflict flashpoints, and regime change, to sports and entertainment. It's live history, anywhere in the world. MBC also offers thousands of original programs -- amateur and professional -- available for mobile download and streamed in real-time. MBC's user network means true global reach. There are now over 4 billion GSM mobile phones, according to the GSM association's latest 2006 reports.

The result will be round-the-clock coverage of the global events that shape the future: pure delivery of information directly from the source.
