German company Indrapark GmbH and Ukrainian company Sollar Software Ltd have come to an agreement on co-operation in the field of software development. The synergy of companies' capabilities allows providing the customers in Germany, Austria, and Switzerland with high quality and at the same time cost-effective software development services.

PR9.NET November 10, 2006 - Germany - Ukraine - German company Indrapark GmbH and Ukrainian company Sollar Software Ltd enter into agreement about co-operation in the field of software development. The main aim of the co-operation is to provide the customers in Germany, Austria, and Switzerland with high quality and at the same time cost-effective software development services.

Such effect is to be achieved due to the synergy of the high standards and unique experience of Indrapark in the complex project management and the great technical skills of Sollar Software personnel.

Indrapark GmbH offers professional software development and outsourcing for such industries as retail, optical industry, ophthalmic optics, measuring technique, electronics, automotive tourism, hotel industry, media, print, power supply.

The main principle is that the outsourcing functions are provided only with a perfect German project management. The customers profit from the most favorable conditions with a German interface. Moreover, as a German company Indrapark complies with German laws. This represents a substantial advantage for the customers, even in times of globalization and the extension of the European Union.

At the same time Indrapark GmbH offers prices which may be as low as half the usual prices in Germany, while providing the customers through know-how and outsourcing partners with high quality software developments and delivery loyalty. The tasks are analyzed by Indrapark internal project managers and software architects and supervised in a very structured way from the development up to the final acceptance. External partner companies in the nearshore areas carry out the tasks according to Indrapark standards at competitive costs.

To date among Indrapark nearshore partners Romanian companies were present predominantly. The partner companies include far more than 200 developers. Nevertheless, new extension of the European Union stimulates the interest to other neighbors including Ukraine.

Bernhard Reissner who holds the position of General Manager of Indrapark (before he was General Manager and Head of Development of Online Software GmbH for 10 years) emphasizes: "It was my first visit to Ukraine and I found it very, very interesting. I was surprised by the amount of people in the professional software business."

Indrapark GmbH is a registered Microsoft partner in the Empower program and has an excellent expert knowledge within the range of all Microsoft technologies. Sollar Software Company develops low-level applications and tools, multi-platform applications for Windows and Linux/Unix, as well as Web applications and e-commerce solutions on the base of .NET and Java technologies (in the dedicated departments).

"We believe that our co-operation will be mutually beneficial for both companies" - Ms Olga Tregubenko speaks. "Excellent knowledge of German market, the traditional German quality standards, established project management guaranteed by Indrapark and cost-effective technical skills of Sollar Software strengthen each other."

Bernhard Reissner seconds this opinion: "Our experience shows that such co-operation allows providing the German customers with high quality, productive and affordable software solutions which really add value to the customers' business. It has been estimated at its true worth by such our clients as Carl Zeiss Vision, METRO Group, Checkpoint Systems, Online Software GmbH, and lots of other companies."

###
