MOZAT has launched a new mobility solution for companies - MORANGE Enterprise Server. This solution for the ordinary mobile phone takes the Push Email functionality as a starting point and offers even more mobility services such as Remote File Access, Mobile Instant Messaging, Mobile Surveillance, Push RSS and PIM Synchronization.

PR9.NET November 30, 2006 - Singapore – MOZAT PTE LTD (MOZAT) today announced the immediate availability of MORANGE Enterprise Server, a new offering aimed at small and medium-sized businesses, branch offices and companies. MORANGE Enterprise Server provides the same enterprise-level security, reliability, features and is available as a free download from the Internet to any customer who purchases a MORANGE mobile service.

While alternative mobile productivity solutions focus mainly on the "Push Email" functionality, MORANGE takes "Push Email" as a starting point and allows enterprises to mobilize their complete IT infrastructure, allowing access from the ordinary mobile phone any employees carry. MORANGE features services such as Push Email, Remote File Access, Mobile Instant Messaging, Mobile Surveillance, Push RSS (Really Simple Syndication) and PIM Synchronization.

MORANGE Enterprise Server is designed for business needs; it is secure, scalable and easily manageable. It is network independent so that users can benefit from the WiFi network coverage in the office and GPRS/3G wireless connection on the road. It is device-independent so enterprises can use MORANGE to equip the mobile workers right on the mobile phone they are using without purchasing a new one. It is carrier independent so one single deployment can span multiple countries and multiple carriers. It works with a normal data plan from the mobile carrier to minimize the recurring cost for the enterprise and maximize the return on investment (ROI).

"In today's fast-paced, competitive environment, mobility is an essential business requirement, but many smaller organizations are looking for solutions that is both cost-effective and functionality versatile," said Mr. Michael Yin, Chief Executive Officer, MOZAT. "MORANGE Enterprise Server provides industry-leading security, functionality, manageability, and back-end integration. With MORANGE Enterprise, we're now making it easier than ever before for new customers to derive the full benefits of complete mobility."

MORANGE Enterprise Server provides the flexibility and IT policy controls - it is a solution tailored to the needs of businesses.
