*General Graphic is pleased to add the SD650 Digital Duplicator, the next wave in digital duplication.*

PR9.NET December 06, 2006 - KAYSVILLE, Utah – General Graphic, a prominent online distributor of office equipment, is proud to announce the addition of the SD650 Digital Duplicator series to its line of office duplication equipment. General Graphic is now offering this Cadillac of digital duplicators online at <http://www.generalgraphic.com/sd650.htm>.

The addition of the new SD650 Digital Duplicator brings a higher level of quality and ease to General Graphic's selection of duplicating devices. The SD650 rapidly produces copies at a rate of 120 sheets per minute and incorporates gripper cylinder technology. The SD650 has an amazing 600dpi print quality that creates high-resolution copies. Its other beneficial features include: accommodating 11" x 17" sized paper, handling various paper stocks, and digitally controlled image positioning.

Digital duplicators are a popular alternative to photocopiers with schools, universities and print shops because their operating costs are less expensive than copy machines for high volume copying. The higher the volume duplicated the higher the savings. General Graphic has prepared an informative guide to help consumers compare savings between photocopiers and digital duplicators. This free guide is available at <http://www.generalgraphic.com/digital-duplicator-cost-guide.htm>.

General Graphic has been specializing in graphic arts and office equipment since 1998. Their complete line of products can be viewed at <http://www.generalgraphic.com>.
