Imagine Tomorrow software teaches more than just computers; every class brings new experiences designed to teach our young students how to think creatively, express their ideas, and apply the skills they are learning to solve problems and accomplish their goals in a fun and exciting approach.

PR9.NET February 07, 2007 - Colorado, USA - Imagine Tomorrow Computer Classes for Kids is now being offered at Learning Adventure Center in Lafayette Colorado and all surrounding areas. Each Imagine Tomorrow Computer Class combines a fun learning adventure with sophisticated technology concepts in a creative way that teaches children to use computers as a tool. Children work on their own computers using Imagine Tomorrow software that is custom built for each lesson and scaffolds to each child's academic and technical ability levels. Small classes for ages 2-7 are led by certified Imagine Tomorrow teachers. Parents receive online password to access lessons learned each class and software activities for reinforcement at home!

The concept was founded in 1991 by former schoolteacher Judy Patterson, and is expanding nationally through licensing opportunities. The Learning Adventure Center is opening in April and is located at Southwest Quadrant of 95th Street and Arapahoe Avenue Lafayette, Colorado. The owners of the location are Misty Forde and Shauna Forde. For information on classes or enrollment, call 877-850-6457. For more information about Imagine Tomorrow, visit online at www.imaginetomorrow.com.

About Learning Adventure Center

Learning Adventure Center teaches Imagine Tomorrow® computer classes for kids. Imagine Tomorrow® software and curriculum teaches more than just computers; every class brings new experiences designed to teach young students how to think creatively, express their ideas, and apply the skills they are learning to solve problems and accomplish their goals. Our unique approach takes fundamental literacy concepts and brings them to life for children by immersing them in a story where they get to become the main character, a computer detective, as they go to imaginative places such as Internet Island or Laptop Lagoon. Every class combines interactive video and software in a proprietary format that allows children to work in a group setting, yet advance at their own pace. Created to incorporate literacy and technology concepts, our program is designed to prepare all young children with the skills necessary to succeed in their future.
