HIMSS 2007 Annual Conference Booth 2874

PR9.NET January 25, 2007 - Bellevue, WA - Pharmacy OneSource, Inc., pharmacy's #1 documentation and formulary software as a service provider, will demonstrate the antibiotic surveillance capabilities of their new Senti7 application during the upcoming HIMSS '07 Annual Conference and Exhibition.

Demonstrations of Senti7 will include:

-- Setting up of rules for alerting pharmacists to possible clinical interventions.

Examples of rules that can be set up in Senti7 include: Antibiotic review when culture and sensitivity reports come back, Medicare CMS quality indicators like surgical prophylaxis stopped 24 hours after surgery, or EPO in Renal Failure Only and much more.

-- Present how the Senti7 automates the review of lab, medication profile and patient demographic information against the pre-defined rules.

Setting up Senti7 doesn't take a computer science degree either! With Senti7 you easily build rules on the fly or in advance with an intuitive point-and-click interface.

-- Show how easily Senti7 works together with Quantifi, our popular clinical documentation offering.

Pharmacy OneSource will be in Booth 2874 during the meeting, which runs from Feb. 25 through March 1 at the Ernest N. Morial Convention Center in New Orleans.

###
