*USONYX announces that it has achieved Certified Partner status in the Microsoft Partner Program with competency in Networking Infrastructure Solutions.*

PR9.NET February 13, 2007 - SINGAPORE – USONYX, Singapore's leading Broadband Web Hosting Service Provider, today announces that it has attained Certified Partner status in the Microsoft Partner Program with competency in Networking Infrastructure Solutions. As a Microsoft Certified Partner, USONYX is able to access resources that will enhance the development of the USONYX.NET platform, thus gaining a competitive advantage in the industry.

Microsoft Competencies' certification helps a partner to differentiate itself from its competitors by using unique Microsoft technologies aimed at customers looking for a specific solution. The Networking Infrastructure is designed for partners with recognized expertise in designing or administering complicated infrastructure applications.

"Microsoft's continued success depends on our valuable partners. Certified Partners represent a high degree of competence and expertise with Microsoft technologies," said Jessie Quek, Director, Small and Medium Solutions and Partners, Microsoft Singapore. "All Certified Partners have access to a rich set of benefits that can help our partners gain an advantage in the marketplace and build revenue, sales momentum, and prominence while increasing market impact. We are glad that USONYX has realized the potential of partnering with us and we believe our partner benefits will help to increase their business potential."

USONYX consistently works on providing customers with services and solutions of the highest industry standards. Besides enjoying ultimate security and reliability when they subscribe to USONYX's web hosting and server solutions, customers will also be entitled to the company's technical expertise 24 hours a day.

"Becoming a Microsoft Certified Partner is an important achievement for USONYX as it demonstrates our expertise in web hosting and our capability in providing consistent and high quality services with the support of Microsoft technologies and applications. The Microsoft Certified Partner status testifies to our customers that we deliver reliable and professional services and solutions to meet and exceed their needs," said Mr. Martin Chan, General Manager of USONYX.

The USONYX.net platform is built on the state-of-the-art Singapore ONE broadband backbone, and is powered by SWsoft's HSPcomplete hosting automation solution and Virtuozzo technology in providing virtualized hosting services. The web hosting platform offers secure, reliable and comprehensive web and email hosting solutions to customers based on their individual needs.

USONYX has also been recently acknowledged as SWsoft's Platinum Partner for its significant commitment to SWsoft technology and actively going-to-market with SWsoft.
