

# Weathered Stone: Buy Product Remnants on ebay

Weathered Stone, January 26, 2007

URL: <http://www.pr9.net/business/trade/5170january.html>

*Weathered Stone launches stone sheets nationwide that do the unthinkable: Bend it over and under and wrap it around the tiniest crevice. Presto! Instant stone surface!*

PR9.NET January 26, 2007 - Fairhope, AL - Weathered Stone is now selling product remnants on ebay®. Weathered Stone™ is a patent-pending, hand-made product that will resurface practically all interior hard surfaces.

Installing the product is relatively simple. No more sawing or sanding to create a custom stone look. The product uses a standard wall covering adhesive for walls and fireplace surrounds. Sean Howard, President and Inventor of Weathered Stone™, has worked with multiple chemists to develop an adhesive called Dura-Core™ that hardens the product from the inside, out. Dura-Core™ is used for floor and countertop applications, and can be purchased directly from the manufacturer. Three applications of a C-500 Urethane™ clear topcoat will complete a floor or countertop application.

"The ease and convenience of installing Weathered Stone™ will revolutionize the way stone surfaces are used," said Howard.

The added bonus of choosing Weathered Stone™ is that it is a repairable product. The Weathered Stone grout is an acrylic based material, and will recolor any nicks or dings in the material. If there is substantial damage, install another piece of Weathered Stone where the damaged occurred. Voila! Instant Fix!

Weathered Stone is produced on a canvas backing; the texture is primarily plaster, and has 15% additives for strength and durability. The product is then cut, cracked, and colored by hand. Weathered Stone™ has 22 standard colors, and custom colors are available. The product is manufactured in pre-cut sizes, and can easily be cut down to any size or shape.

###
