TankDepot.co.uk is set to revolutionise the delivery of diesel fuel at construction sites, following the addition of the Titan TruckMaster to the company's range of environmentally preferred fuel and liquid storage tanks.

PR9.NET February 25, 2007 - LITTLE EATON, UNITED KINGDOM Online storage tank specialist, TankDepot.co.uk is set to revolutionise the delivery of diesel fuel at construction sites, with the addition of the Titan TruckMaster to the UK company's fast growing range of fuel oil and liquid storage tanks.

Until now, the on-site refuelling of diesel powered vehicles and equipment has always been problematic. You've either found yourself being forced to tow a bowser trailer behind you, or to load up with 'Jerry Cans'. But with the advent of the new Titan TruckMaster from TankDepot.co.uk, you can now unhitch your bowser trailer and leave your Jerry Cans at home.

Light and portable, TankDepot.co.uk's new ADR approved Titan TruckMaster fuel dispensing system simply straps on to the back of a truck or pick up, enabling you to carry the diesel you need to refuel on site. The result is swifter, safer on site refuelling, saving you time, money and hassle.

The TruckMaster features ADR (international Carriage of Dangerous Goods by Road) and UN IBC approvals. Suitable for transportation of Diesel (D) fuel, the TruckMaster features an inherently useful 430 litre capacity.

Integrally moulded baffles minimise fuel surge during transit, whilst UV stabilised thermoplastic construction ensures the product will not fade, crack or corrode. When fitted to a vehicle, the Titan TruckMaster does not require ADR Driver Training, it is not necessary to fit Orange Hazard Plates and a TREM (Road Transport Emergency Card) is not required. However, under ADR requirements, the driver is required to provide a transport document.

Like every Titan tank, the TruckMaster is bristling with added-value 'extras' as standard. Factory fitted features include a 12 volt / 40 litres per minute pump; 4 metre fuel resistant delivery hose; 4 metre battery fly leads; tank contents gauge; trigger nozzle with automatic shut off; and for complete peace of mind and security, a lockable lid.

As well as the standard TruckMaster which is designed specifically for the storage of Diesel (D), TankDepot.co.uk can also supply Titan TruckMasters, purpose designed for the storage of Hydraulic and Lubricating Oils.

The addition of the TruckMaster, complements TankDepot.co.uk's existing range of Titan plastic tanks. Already available online from TankDepot.co.uk are Titan's 'Standard' and 'Talking Titan' ranges of Single Skin Oil Tanks; 'EcoSafe' Bunded Oil Tanks; 'FuelMaster' Diesel and 'BioMaster 30' BioDiesel Tanks; 'SpillSafe' Oil Recycling Banks; together with a comprehensive range of Potable and Non Potable Water Tanks.
