*Deacom, Inc. will present "Single System Software for Commercial Modular Construction" at the Modular Building Institute's Annual Convention on March 13, 2007.*

PR9.NET March 06, 2007 - WAYNE, PA – Deacom, Inc. will present "Single System Software for Commercial Modular Construction" at the Modular Building Institute's Annual Convention on March 13, 2007 from 11:30-12:30 p.m. This session will be the first in-depth discussion held at the MBI Convention about the utilization of an integrated software system designed specifically for the day-to-day operations of pre-fabricated building, building component, and building product manufacturers.

Jay Deakins, founder of the DEACOM Integrated Accounting and Enterprise Resource Planning (ERP) Software System for the building manufacturing industry, will teach attendees how to use one software system to seamlessly link their engineering design software to their entire business, including inventory, building configuration, financials, and production scheduling. By integrating operations, manufacturers may avoid common industry inefficiencies, such as duplicate data entry, data corruption, and complicated user training.

MBI executive director Tom Hardiman says, "As the leading association for the commercial modular buildings industry, we are always pleased to introduce new technology and services that can help maximize the productivity and profitability of our trade."

Attendees of the MBI Annual Convention are invited to view a demonstration of the DEACOM ERP System at booth #214 during exhibit hours. Online DEACOM demonstrations are also available by calling 610-971-2278 ext. 15 or visiting [www.deacom.net](http://www.deacom.net).

To register for the MBI Annual Convention, visit [www.mbinet.org](http://www.mbinet.org).
