NavQuest.com the internet's only FREE Online Marine Navigation service announced today that NOAA (National Oceanic & Atmospheric Administration) marine charts are now available for download at NavQuest.com.

PR9.NET March 19, 2007 - Boca Raton, FL - Visitors to NavQuest.com can easily download, view, and browse NOAA charts on mobile devices, PDA's, and Smart Phones.

President Harry Sangha, "Giving our users another tool to aid them in marine navigation, and help simplify the boating experience is a high priority." Mr. Sangha continued, "The ability to have marine charts available on a mobile device, enhances the users experience and is a value added feature to NavQuest.com that we are excited to make available."

The NOAA marine charts available for download at Navquest.com require Adobe® Mobile Viewer. Currently the follow Operating Systems are supported:

- Pocket PC
- Palm OS for Windows & Macintosh
- Symbian OS: Nokia Communicator 9500 series, version 1.1 and Nokia 6680 Smartphone, version LE 1.0
