Emanio, Inc. expands its EDI software offering with new Order Management Software.

PR9.NET March 19, 2007 - Berkeley, California - EMANIO, Inc. - a leading provider of Data Mapping, Data Integration (DI) and Electronic Data Interchange (EDI) solutions, announced today the pending release of its new Onboard™ purchase order and shipment management software. EMANIO Onboard™ Wal-Mart edition will be officially available for shipment as of March 31st, 2007.

"Our customers have been telling us for some time that they needed an easier, faster way of managing their in-bound purchase orders and their outbound shipments," stated Mr. KG Charles-Harris, EMANIO's CEO. EMANIO Onboard™ introduces a new, easy to use interface along with a powerful set of features that make the product ideal for both small and large companies; Mr. Charles-Harris commented on the ease of use by stating that "with EMANIO Onboard™ we are releasing a product that pushes the envelope in functionality and in ease of use, we firmly believe that ease of use and power are critical needs for our customers."

Emanio Onboard™ Wal-Mart edition provides a dedicated software module that allows Wal-Mart trading partners to receive purchase orders, convert them to sales orders and use the same data from those purchase orders to create outbound advanced shipping notices (ASNs) quickly and easily. "We have been looking for an easy to use, reasonably priced yet powerful ASN management tool for some time," said Joanne Pena of Rody & Company, "EMANIO OnBoard™ Wal-Mart® Edition fits the bill perfectly for our organization." With the ability to create shipments from individual or multiple purchase orders, EMANIO Onboard™ Wal-Mart edition provides small and large organizations with easy to use, affordable software to expand their EDI toolset.

EMANIO Onboard™ Wal-Mart edition is designed to work specifically with Wal-Mart purchase orders and works in conjunction with EMANIO's TradingPartner™ software to send ASNs to Wal-Mart automatically. Anyone purchasing EMANIO OnBoard™ Wal-Mart® edition will be eligible for a free upgrade to the multi-trading partner version of OnBoard™ once its available later in the year – a savings of well over \$1,000.

Onboard™ Wal-Mart edition is available from EMANIO under its policy of providing firm, fixed price quotes to customers that cover both software and implementation services. By giving fixed prices of the budgetary resources needed to bring EDI in-house, EMANIO allows its customers to understand the requirements of a software deployment at the beginning of the purchase process.

Organizations interested in EMANIO Onboard™ Wal-Mart edition may contact EMANIO sales at (510) 849-9300 or by sending an e-mail to sales@emanio.com.
