WANdisco to Offer Professional Support, Training, and Consulting Services for Subversion

PR9.NET April 05, 2007 - PLEASANTON, Calif — WANdisco, the world leader in real-time multi-site development solutions announced today that it would provide professional support services for Subversion. In order to meet the growing demand for enterprise-class support for Subversion, WANdisco will offer the following services:

1. Subversion Support Subscription - a set of services and tools that assist enterprises during every stage of deployment - from implementation planning, to on-going administration and maintenance. WANdisco Support Subscriptions help reduce business and technical risks, increase IT productivity, and insure successful Subversion deployments.
2. Subversion Consulting Services - While the migration to Subversion provides many benefits, there are important questions that need to be answered to insure a successful deployment. WANdisco's consulting services assist in all facets of Subversion roll-out including migration from other source code management systems including CVS, IBM ClearCase and Borland StarTeam.
3. WANdisco Training Services – Designed to help both users and administrators jump start Subversion adoption and on-going use within your organization. Training services can be tailored to specific needs and are available in both classroom and online formats. Topics include: introduction to features & functions, overview of Subversion clients, implementation of Subversion in conjunction with Apache, branching, merging, conflict resolution, locking, bug fixes, and administration.

"We see professional support for Subversion as a critical requirement of any enterprise deployment," said David Richards, President & CEO of WANdisco, Inc. "Our existing customers have been telling us that there is a gap in the market for these services and we have the staff with the unique skills required to solve this problem."

Availability
