Custom Craft Plastics Baseball Display Cases Product Line is Joined by Football, Basketball, Soccer, Hockey and Other Sports Collectible Cases

PR9.NET April 17, 2007 - Santa Fe Springs, CA - - Custom Craft Plastics, designer and manufacturer of innovative display products for sports memorabilia and collectibles, moves beyond its baseball display cases line with other sports display cases.

Custom Craft Plastics has produced acrylic baseball display cases for almost 10 years and is expanding their product line to include many other sports display cases. Baseball display cases will continue to be made, but in addition, other sports display cases and sports collectible display cases will be added.

"We are expanding our product line to include many other categories and styles of sports display cases." says Harry Vitto, founder of Custom Craft Plastics, "Baseball, football, basketball, soccer, hockey, golf, boxing and other sports display cases will be produced as well as sports collectibles such as bobblehead dolls, unique sports equipment and more."

Hand crafted and made from quality acrylic plastic, sports display cases from Custom Craft Plastics are superior to many sports collectible display cases. Not only does hand crafting display cases create superior quality, but the handcrafting also allows for better shaping of the plastic display cases. The ability to create rounded display cases and to make the cases stronger are just some of the benefits.

Additional information on Custom Craft Plastics and their products can be found on the revised web site at <http://customcraftplastics.com>. Information can also be obtained by calling the Southern California headquarters at (800) 217-7779

About Custom Craft Plastics

Custom Craft Plastics, Inc. is an innovator in the acrylic plastic fabrication industry. Our company designs, manufactures and silk-screen prints standard and custom products. All our products are hand built for superior quality, yet our pricing is some of the best in the industry for this level of work.

Hand crafting of our items allows us to produce superior looking products as compared to other companies that use molds to form their items. While molded products can be less expensive when mass produced, they tend to leave noticeable imperfections from the molding process.
