*Audio4fun.com has already created some new tutorials to guide their users to properly use the AV Voice Changer Software Diamond 5.5 together with many new Parody Voice Packages (<http://mp3-player.audio4fun.com/tutorials/voice-changer-tutorial09.htm>)*

PR9.NET April 21, 2007 - Nicosia, Cyprus - Audio4fun.com has already created some new tutorials to guide their users to properly use the AV Voice Changer Software Diamond 5.5 together with many new Parody Voice Packages (<http://mp3-player.audio4fun.com/tutorials/voice-changer-tutorial09.htm>)

With the built-in Parody Maker and Parody Mixer of the Diamond Voice Changer, the users can mimic any others' voices, even Hollywood stars' and all famous people's.

To try this new function, of course the users need to have the AV Voice Changer Software Diamond 5.5 and then download the parody voice packages for free (<http://www.audio4fun.com/parody-voices.htm>)

Here are some simple steps for the new users to use and create a parody voice:

#### Step 1: Open Parody Module

Click on Parody button to open the Parody Maker where we can add their own voice and make a new Parody voice.

#### Step 2: Add parody voice

We can record our own voice with a microphone or add an audio file of someone's voice, such as a short speech of George Bush, an interview with Justin Timberlake, etc. by one click on the Browse button. Now we have a parody voice which automatically changes our real voice to sound like itself.

#### Step 3: Mix different voices with Parody Mixer

There are 4 Parody voices we can use at the same time. If we want to sound like one of those voices only, we need to move the Parody cursor to 100% of this voice, otherwise we can mix all 4 Parody voices with different percentages.

For more information, please click to visit our tutorial pages:
