New XRackPro2 Server Rack for Noise Reduction Will Begin Pre-Order Today

PR9.NET April 30, 2007 - Torrance, CA – GizMac Accessories, designer and manufacturer of the XRackPro2 server rack enclosure cabinets for noise reduction, begins pre-order of new model.

GizMac has started accepting pre-orders for the soon to be released 6U XRackPro2 model. The new 6U size server rack will join the current 25U, 12U and 4U XRackPro2 models in the battle to reduce noise from loud equipment. The upcoming 6U model is expected to reduce noise by up to 80%, as with the current XRackPro2 server rack line.

"This new 6U size XRackPro2 provides the right amount of space for a small combination of computers, RAID systems, switches, battery backup, etc." says Ken Vitto, Director of Marketing for GizMac Accessories, "Apple, Linux, SGI, Sun, Windows and other rackmount equipment will benefit from this new 6U XRackPro2."

Noise reduction engineering of the XRackPro2 server rack allows computer, audio / video and other systems to be placed in areas that require low noise. Post production for film, video and audio editing; television, cable and radio broadcasting; medical offices, business offices, schools or any other environment that requires low noise will benefit from a XRackPro rack.

The 6U XRackPro2 is available for pre-order now, pricing is \$749.99 US retail and it is expected to be shipping in May. Additional XRackPro information can be found on the web site at <http://www.XRackPro.com> or by calling the corporate headquarters at (800) 475-1677.
