Standard steel buildings LLC are arranging a small session where they will speak about the benefits & many advantages that pre-engineered steel buildings provide on June, 16

PR9.NET June 14, 2007 - Rockwall, TX - Standard Steel Buildings – Churches & other religious organizations can now have no confusion in deciding steel buildings over traditional structures when constructing or renovating their holy places. Standard steel buildings LLC are arranging a small session where they will speak about the benefits & many advantages that pre-engineered steel buildings provide on June, 16

"Educating the consumer on the entire process, illustrating a way buyers can save up to 50 percent off of conventional construction costs and providing a timetable to have the church built in a fraction of the time.", says, Kevin, founder of Standard Steel Buildings LLC.

"Drawing on my 10 years of international experience, I developed these two presentations to address the most critical issues that can help religious organizations have a cost-effective, flexible, low maintenance and an energy sufficient structure."
