Prospeed.net delivers business class bonded IP solutions to meet mission critical applications.

PR9.NET July 27, 2007 - Nashua, NH – Prospeed.net, national provider of converged voice and data communications, announced that it has launched a Bonded T1 service for small to medium sized enterprises over its National Network. Prospeed.net Bonded T1 service combines two 1.5 Megabits per second (Mbps) T1 lines together, allowing businesses with robust and symmetrical 3.0 Mbps data speeds. The service is available nationwide.

"Our Bonded T1 solution, seamlessly operates as a single connection, allowing businesses to cost-effectively scale bandwidth as their needs change," said Colin King, Prospeed.net Vice President. "With Bonded T1, Prospeed.net customers enjoy lower costs, faster data speeds, quick installs and maintenance than they do with separate T1 lines. We also provide 24x7 and dedicated support to ensure superior connectivity."

Prospeed.net also offers other converged solutions, such as its ADSL2+ service. This high bandwidth solution offers up to 15Mbps download and 1Mbps upload. Additionally Prospeed.net offers Business Class Hosted PBX VoIP service all over its national IP network.

The Prospeed advantage:

- * Prospeed.net's private national network offers maximum security and mission-critical reliability for your T1.
- * Exceptional Customer Support - Get help any day, any time from experienced Boston-based technicians.
- * Our Service Level Agreement (SLA) guarantees your T1 bandwidth with 99.99% uptime, low latency, and no packet loss. Your business deserves the best. Put Prospeed.net on your list and compare our T1 features, installation, support and pricing.

Bonded T1 3Mbps only \$750.00
Static IPs
Full 24/7 support
Full SLA
Optional Web-hosting and VoIP Service.
