Iowa Public Library distributes Firewall Pro to its members

PR9.NET July 31, 2007 - Jersey City, NJ - Comodo, a global leader in Identity and Trust Assurance Management solutions, announced today that the Davenport Public Library of Davenport, Iowa, will actively distribute free desktop security to its members, including Comodo's Firewall Pro.

The Davenport Public Library, in its outreach to new and current members, has created a useful CD-ROM that it will distribute for free. The CD will include useful software, including Comodo's Firewall Pro, which its members can use on their own personal computers.

Firewall Pro continues to outperform its competitors in numerous threat tests. In July alone, it received 3 media accolades and awards from Computerworld.com, FileCluster.com and Web User magazine and was recently rated #1 in Matousec's leak test of 38 leading firewalls. Comodo was the only firewall to pass every single leak test and was only one of 3 to receive an "excellent" rating.

"It gives us a great feeling to know that our Firewall Pro is being shared within communities," said Melih Abdulhayoglu, CEO and Chief Security Architect of Comodo. "Davenport Public Library has reached out to its members to make sure they are safe online. Many more libraries and community groups are soon to follow."

For more information and to download Comodo's Firewall Pro, please visit: <http://www.personalfirewall.comodo.com/>.
