PR9.NET August 06, 2007 - Mobile, AL - Introducing MTI Mentored Learning Solutions. Mobile Technical Institute is pleased to introduce flexible, convenient, and effective mentored training solutions for the Mobile, AL market. MTI's mentored training options are an innovative approach to training, providing on-demand, local access to world-class training, in a supportive mentored computer lab environment.

MTI's mentored learning solutions are ideal for individuals in the Gulf Coast region who have specific training needs in the areas of software applications, information technology, programming, database administration, project management, and other related areas requiring high stakes certification knowledge. Instead of having to wait for pre-scheduled classes, learners can enroll in the program or class of their choice at any time and complete training at their convenience during the training center's operating hours.

MTI's mentored learning solutions are available for a wide variety of topics, many of which have previously been difficult to find in the Mobile, AL area. According to Randall Olson, MTI's Technology Training Director, "MTI's new mentored learning option allows individuals with specialized IT and software application training needs to have local access to the highest caliber of instruction without having to incur the expense and inconvenience of travel for training. We are bringing the training that our clients need to our centrally located Mobile, AL facility."

Students will work closely with MTI's course advisor to develop a targeted learning program specific to their needs. Mentored learning participants are able to concentrate on learning what they need to know without having to bother with what they have already mastered. Once enrolled, students will work closely with an in-class training mentor, have 24/7 online access to world-class subject matter experts, and benefit from text-based and video-based training materials and practical exercises.

According to Olson, "MTI is introducing mentored learning in direct response to what individuals and corporations in the local market have told us that they need. In keeping with MTI's philosophy of delivering "straight to the point, straight to work " training solutions, we are excited to make this diverse and convenient training model available in the Mobile, AL area. MTI also offers online training solutions to meet individual training needs regardless of location. For information about MTI's mentored learning solutions and other training services, see www.mobiletechwebsite.com or call 251-478-6848.
