Sourcingmap.com announced their Learning DIY Toy - Educational Airfoam Building Block University Houses for DIY Lover, which not only enrich children's home and school experiences but also create a right learning environment for children.

PR9.NET August 07, 2007 - HongKong - After the Traditional Toys Exhibition hold on Children's Day , Sourcingmap.com announced their Learning DIY Toy - Educational Airfoam Building Block University Houses for DIY Lover, which not only enrich children's home and school experiences but also create a right learning environment for children.

With the constantly attention to Children's education, more and more parents are beginning to realize toys weren't just for the kid's fun, but that they'll somehow fulfill a certain educational need and put basic practices in the child head. And they also know that if the toys are not appealing they will likely just sit on a shelf .So, a nice quality educational toy for a kid is vitally important.

As children play with educational toys, they begin to put together complicated academic concepts in a natural environment and setting which leads to better understanding. Sourcingmap (<http://www.sourcingmap.com>) recognizes the importance of providing educational toys for children all around the world, they successively launches Traditional Toys and Learning DIY Toys.

Imaginary play is usually confined to the Pre-K and kindergarten years of school. Children learn how to relate to others, they self-talk to solve problems, they act out real-life situations, and they problem-solve as they are engaged in imaginary play. From this point of consideration, Sourcingmap.com announced their Learning Toys which adopt light airfoam material, non toxic and harmless and is really DIY (do it by yourself) toy for enhancing your children's assembly ability.
