*On BreakfastBytes, a Popular NPR Show, Melih Abdulhayoglu, CEO of Comodo, Describes How Consumers Can Keep their PCs Protected.*

PR9.NET August 09, 2007 - Jersey City, NJ - Comodo, as a group of Internet security companies, announced significant enhancements to their portfolio of free desktop security and trust assurance solutions. The Comodo companies are committed to transforming desktop security from a "detection-based" model to a "prevention-based" model and have developed new technologies to encourage this change.

In a recent interview with National Public Radio's (NPR) BreakfastBytes hosted by Felicia King and Ray Koukari that aired on WGTD in Wisconsin (8/04/07), Melih Abdulhayoglu CEO and Chief Security Architect of Comodo explained how recent innovations in Comodo's desktop security solutions are changing the face of desktop security. Unlike other security vendors, Comodo's approach uniquely identifies safe applications rather than simply detecting and blocking harmful applications. This approach employs a white list technology and only allows trusted applications access to the PC.

## 1) Comodo Firewall Pro

Comodo's advanced firewall has received major industry recognition and provides robust security within a "plug 'n protect" solution architecture. The firewall has received the following reviews (and often besting expensive paid versions):

Who: PC Magazine Online Edition

When: May 30, 2006

<http://www.pcmag.com/article2/0,1895,1969485,00.asp>

What they said: "kick ass firewall" ... "It keeps hackers out and tricky unauthorized programs off the Internet."

Who: PC Magazine Print Edition

When: August 2006

What they said: "Provides high level of security within an easy to use interface...it resists being terminated a key component of a good firewall..."

Who: Matousec.com

When: March 2007

<http://www.matousec.com/projects/windows-personal-firewall-analysis/leak-tests-results.php#firewalls-ratings>

What they said: "Rated as the clear winner of our tests ... Comodo Personal Firewall"

Who: TechTarget

When: December 22, 2006

[http://searchsecurity.techtarget.com/tip/0,289483,sid14\\_gci1236619,00.html](http://searchsecurity.techtarget.com/tip/0,289483,sid14_gci1236619,00.html)

What they said: "Intelligent way to protect against attacks..."

Who: FirewallLeakTester.com

When: on-going in 2006

<http://www.firewallleaktester.com/termination.php>

What they said: "Top rating ... the firewall blocks successfully the termination method, and possibly warns the user about it. This is the safest and most secured result."

Who: Computerworld.com

When: July, 2007

<http://www.computerworld.com/action/article.do?command=printArticleBasic&articleId=9026125>

What they said: One of the top 15 free security programs, "Comodo offers true, two-way firewall protection, is highly configurable and,

(unlike most other firewalls) provides a great view of your system and your Internet connection."

Who: Web User magazine (Print)

When: July, 2007

What they said: Web User 2007 Gold Award, "The latest version of Comodo is without a doubt the free firewall to look for. It'll work with XP and Vista and, in our tests, proved to be the most effective barrier."

- 2) Comodo BOClean
- 3) Comodo Anti Virus (BETA)
- 4) Comodo Backup
- 5) Comodo VerificationEngine
- 6) Comodo Memory Guardian (BETA)
- 7) Email certificates
