*Two new Braille products for children have made their way off the R&D table and onto the Bitty Braille website.*

PR9.NET August 17, 2007 - Rome, NY - Bitty Braille, the best online shop to find modern, handmade Braille products for children, is proud to announce the latest additions to its Braille Collection. Like the first goodies to hit the Bitty Braille website, the new items will introduce Braille to the young and bring awareness of the blind community.

The first new product is a luscious modern baby blanket made with soft, fine-wale ivory corduroy paired with a plush pastel dot fabric. To add more to this textural feast for baby, a soft polar fleece panel features babies' first initial in Braille made using blanket-stitched felt dots. The lovey size of 17" square is perfect for toting around everywhere and sure to be babies favorite blanket.

The second new product in this unique and modern line of goodies is fun hair clips for girls, bitty AND big. Sturdy metal clips are covered in rich grosgrain ribbon and feature a first initial in Braille on a pearly white flower. The clips coordinate perfectly with all the Bitty Braille tees for girls and come in olive, sky, pale pink and chocolate.

"I love to work on new ideas to add to the Bitty Braille line. I'm so happy to be able to offer more customizable products featuring Braille", says Dutt, owner & designer of Bitty Braille. While there are more ideas in the design room, the two latest products along with the original tees and birthstone charms should satisfy everyone's need for a unique, charitable (10% is donated to the American Foundation for the Blind) and awareness-making Braille product.
