*PSI behavioral healthcare facilities have chosen VSS PRO as their nurse scheduling software.*

PR9.NET August 21, 2007 - FARGO, ND – Visual Staff Scheduler PRO (VSS PRO) scheduling software has recently been selected by two Psychiatric Solutions Inc. (PSI) healthcare facilities for their nurse scheduling needs. Cumberland Hospital, New Kent, VA and San Marcos Treatment Center, San Marcos, TX began using VSS PRO this summer after learning how other behavioral health treatment centers have benefited from the software. Other PSI locations utilizing VSS PRO scheduling software include Alliance Health Center (Meridian, MS), Belmont Pines Hospital (Youngstown, OH), Brynn Marr Hospital (Jacksonville, NC), Riveredge Hospital (Forest Park, IL), West Oaks Hospital (Houston, TX), and Wellstone Regional Hospital (Jeffersonville, IN).

## How VSS PRO Nurse Scheduling Software Helps with Staff Scheduling

VSS PRO is an easy-to-learn scheduling software that is quick to set up and flexible to meet the medical scheduling needs of any healthcare facility. "With VSS PRO scheduling software we are able to set up the program to meet the individual needs of our hospital. It has been a tremendous help... wonderful!!! I am able to schedule all of our 110 clinical staff members quickly and easily, and make changes on-the-fly to properly staff each shift. I can see at-a-glance all time-off requests and vacation/sick time, and then complete the schedule with the right amount of people required for day, afternoon, and evening shifts," says Kristen Murray, Scheduling Coordinator, Belmont Pines Hospital, Youngstown, OH. "With just a few clicks, VSS PRO prints out all 110 individual schedules and separate department schedules for any given period. VSS PRO also keeps record of all past schedules for as long as we need to. I couldn't imagine doing my job without it," Murray adds.
