*With the current crisis in the education system today, we are all looking for solutions that will give schools, students and their families the support they need to provide a positive and effective learning environment no matter what their socioeconomic level is. Solutions that are affordable and effective will be the way of the future.*

PR9.NET September 04, 2007 - Denver, CO - A revolutionary new training manual "The Choice Is Mine" is now being positioned to help with the crisis faced in many American school systems today. This unique and pioneering course provides a solid picture and detailed pathway for assisting youths and their families into building empowering, supportive and open relationships, with peers, family members, and authority figures. Its use has been highly successful in showing and assisting younger adolescents, teenagers and families who are struggling in different ways because they are making unaware/poor choices. The Choice is Mine immediately strengthens and fine-tunes core values, thereby changing destructive patterns by building constructive ones... from the inside out.

This powerful empowering process was developed by Veronique, a Life Consultant and founder of the Enlightened Heart Foundation, created the first HOW to the WHAT that most personal transformation books talk about. "Because this process works at both the conscious and subconscious levels, it is really only a matter of following the step-by-step guidance in the book. Most people will see and experience results that have come so easily, they won't realize it was from the work they had done with the manual."

Conditions, such as feelings of low self worth, blatant or subtle anger, non-academic success, and disruptive family, school, work and/or peer situations are more easily overcome because it becomes instinctive, as it is a natural outcome of studying this material. We begin at the beginning, by teaching youths to work FOR, and not AGAINST anything. This course builds honoring and strengthening the uniqueness of each child, supporting their inner guidance system and intuition as a way to extend their enthusiasm within.

The Choice Is Mine provides comprehensive explanations, touching, clarifying, and illustrating through a clear-cut understanding that any age is able to absorb. "This course fits within middle school reading levels through pre and postgraduate levels", said Veronique. "The goal of our youth programs is for each youth to discover their inner brilliance, respect, and honor one another as they create the greatness of the next generation."

"I am the mother of 7 children," said Charlotte Murphy, "My four younger children have had the benefit of The Choice Is Mine and their life, and mine with them, is much easier than with my first 3. They are honorary students in school, full of confidence, and joy, and a great pleasure to be around. Their performance of excellence and respect for teachers and authoritative figures is recognized consistently and they are this way at home as well. I know they will continue to excel in life, because they have A FRAMEWORK for Life™ The Choice Is Mine assists them in a consistent and supportive direction building from the inside out... and so do I. These TOOLS really WORK! "

"With these manuals used in the schools and in youth programs, we will be able to really see substantial differences in how children interrelate with each other. Children who have high self worth don't feel the need to bully anyone, or be in so much anger that they feel the need to take that anger out on others with guns," said Veronique.
