*Hosted Solutions announces that Useful Technology is centralizing its IT infrastructure in their world class Boston data center facility.*

PR9.NET September 13, 2007 - Boston, MA - Hosted Solutions, the East Coast's leading Data Center and Managed Services Provider, has added Useful Technology, an emerging next generation technology company and creator of the first solution for making applications hyperconnective, to their impressive portfolio of Software-as-a-Service providers. The Plantation, Florida developers of the first hyperconnective software for applications felt that maximizing their uptime for distribution of their product was foremost in their final decision. The Hosted Solutions Hi-Touch colocation solution will support Useful Technology's aggressive expansion efforts by providing reliability and availability to Useful Technology's top distribution channel. The decision utilizes Hosted Solutions' Boston data center facility and secure network, and will give Useful Technology access to the latest in hosting technology.

Hosted Solutions Boston data center will provide Useful Technology with a world-class colocation facility in which Useful Technology's core applications will reside. The Hi-Touch colocation agreement takes advantage of Hosted Solutions carrier grade facility, fully redundant multi-provider network architecture, and industry leading customer support 24x7. By providing Software-as-a-Service companies with services that are cost effective, but provide deep functionality and very little maintenance, Hosted Solutions has developed great relationships within the SaaS market.

"Our backend services are delivered in a hosted model, so we were looking for a colocation provider that had the capacity to grow with our business and that can provide us with 100% network availability," stated Jason Milgram, CEO of Useful Technology.

"Useful Technology needed a local partner who could meet their current and long-term needs," said Rich Lee, CEO of Hosted Solutions. "Reliability is critical to any online business. We provided them with a flexible technology solution that guarantees network availability and can expand with their fast growing business."
