AXIGEN announces the takeoff in the beta testing campaign for version 5.0 of the AXIGEN Mail Server.

PR9.NET September 17, 2007 - Bucharest, Romania – AXIGEN (<http://www.axigen.com>), the professional messaging solution vendor, announced today the takeoff in the beta testing campaign for version 5.0 of the AXIGEN Mail Server.

Following the "Work Smart, Play Hard!" slogan, sysadmins from around the world are invited to test the new features of AXIGEN Mail Server and have the possibility to win one of the 3 Nintendo Wii consoles given as main prizes. The 3 consoles and a lot of consolation kits will be awarded to those reporting the largest numbers of significant bugs.

"This new beta testing campaign is meant to illustrate our product philosophy: we develop powerful, fast and reliable solutions to speed up and render all the messaging tasks automatic, so that AXIGEN Mail Server users have enough remaining time to shift focus to other important issues and even to play hard. Working smart with AXIGEN 5.0 entails time and cost savings and is the best solution to face current growing speed and efficiency demands in the messaging area," stated Oana Bornaz, AXIGEN CEO.

Version 5.0 of the AXIGEN Mail Server comes with a set of features aimed at enhancing server usability and the overall user experience. Thus, the web based administration interface, WebAdmin, has been reshaped to now feature a modern, user friendly design and to improve manageability and fine-tuning options.

With a strong focus on ISP/HSP companies and large corporations, task delegation capabilities were also introduced in AXIGEN 5.0. In other words, the new version allows for domain administration to be delegated to system administrators located elsewhere, therefore meeting the requirements of both service providers and multi-branch companies. Furthermore, AXIGEN 5.0 comes with the possibility of creating different behavior templates for the administered user accounts, through the Account Classes parameters.

The beta testing campaign will last for about four weeks, until the release of the commercial version of Axigen Mail Server v 5.0, scheduled for October. All AXIGEN Mail Server friends are hereby invited to join the competition using the information available here: <http://www.axigen.com/beta-testing/>
