Hosted Solutions announces that Camstar Systems, Inc. is centralizing its IT infrastructure in their world class Charlotte data center facility.

PR9.NET October 10, 2007 - Charlotte, NC - Hosted Solutions, the East Coast's leading Data Center and Managed Services Provider, has added Camstar Systems, Inc., a leading provider of enterprise manufacturing execution and quality systems (MES), to their impressive portfolio of software providers. The Charlotte, North Carolina company provides the most flexible and robust solution for managing manufacturing operations across distributed production facilities, optimizing resource allocation, rapidly responding to changing conditions, and integrating critical manufacturing information real-time with the business. Hosted Solutions' flexible IT solution will support Camstar's aggressive expansion efforts by providing reliability and availability to Camstar's web facing applications and internal infrastructure. The decision utilizes the Hosted Solutions' Charlotte data center facility and secure network, and will give Camstar access to the latest in hosting technology.

Camstar Systems, Inc. is receiving Hi-Touch managed backups, network services, and colocation services which are monitored and maintained by Hosted Solutions at its world-class Charlotte Data Center facility. In providing all of the services, Camstar is entrusting Hosted Solutions to manage their application infrastructure and aid in their disaster recovery efforts. The Hi-Touch colocation agreement takes advantage of Hosted Solutions SAS 70 type II certified carrier grade facility, fully redundant multi-provider network architecture, and industry leading 24x7 customer support. By providing software companies with solutions that are cost effective, but provide deep functionality and very little maintenance, Hosted Solutions has developed great relationships within the software provider market.

"Data security and system reliability is first and foremost in a customer's mind when selecting a service provider," stated Scott Jones, CTO of Camstar. "We needed a partner who could provide a secure environment and dedicated physical infrastructure. We also needed our partner to be flexible and responsive as our needs expand over time. When combined with our comprehensive set of platforms, choosing Hosted Solutions as our partner has created a best-in-class solution for the needs of Camstar Systems."

"Reliability is critical to any online business. We are very pleased to work with Camstar and to provide the infrastructure they need to deliver their applications in a secure, reliable environment," said Rich Lee, Founder and CEO of Hosted Solutions. "This is a great example of how Hosted Solutions' experience at providing highly-available and cost-effective IT infrastructure services allows our clients to remain focused on their core competencies and provides them with a differentiator against their competition."

###

About Camstar Systems, Inc.

Camstar's Enterprise Manufacturing and Quality Solutions help manufacturers rapidly boost the performance of their distributed manufacturing operations by delivering complete visibility and by providing the flexibility required for rapid growth and change. Camstar's unparalleled solution monitors, controls and synchronizes global manufacturing, delivering process interoperability and best practices – resulting in maximum agility, the highest quality products, and leaner, more efficient operations.

About TeleHealth Services
