*XRackPro2 Server Rack for Noise Reduction Now Shipping with Air Filtration System.*

PR9.NET October 24, 2007 - Torrance, CA – GizMac Accessories, leading manufacturer of innovative electronic equipment racks that reduce noise, introduces the second generation of the XRackPro2 noise reducing server racks.

In addition to reducing noise up to 80%, the new XRackPro2 features an air filtration system. The air filtration provides cleaner air into the enclosure and ultimately into the computer and other electronic equipment located inside. The controlled airflow of the XRackPro2 aids cooling, improves noise reduction and allows for an air filtering system to function.

"Cleaner air means cleaner equipment; cleaner equipment means reduced maintenance and less down time." says Ken Vitto, Director of Marketing for GizMac Accessories, "We are excited to have developed air filtration for the second generation XRackPro2, some companies will buy the new XRackPro for the filtering alone and the noise reduction will be an added benefit."

Filters used in the XRackPro2 are custom made and particularly suited for this application. The pleated design of the filter provides greater surface area for trapping more particles while allowing superior air circulation. The custom air filters are reinforced with a metal grid to prevent collapsing due to the high airflow volume created by the fans that direct air in and out of the XRackPro2.

The XRackPro2 is perfect in post production facilities for film, video and audio editing; television, cable and radio broadcasting stations; business and medical offices, schools or any other environment that requires low noise. With the air filtering system addition, the XRackPro2 is also a much needed solution for environments with higher than usual levels of dust and other air particulates.

Second generation XRackPro2 models with the new air filtration system are available now on the 12U and 25U XRackPro2 models; U.S. retail prices are \$1,899.99 and \$2,349.99 respectively. The XRackPro2 can be obtained from authorized domestic and international resellers and distributors or purchased directly from the XRackPro web site at <http://www.XRackPro.com> and by calling the corporate headquarters at (800) 475-1677.
