*Anteater Pest & Lawn Services today announced the addition of new Holiday Lighting services for residential and commercial properties -- available in both Tampa and Orlando locations!*

PR9.NET October 26, 2007 - USA/Orlando & Tampa, FL - Anteater Pest & Lawn Services today announced the addition of new Holiday Lighting services for residential and commercial properties -- available in both Tampa and Orlando locations!

Now is the time when people usually start to think about minimizing holiday hassles. Many Floridians are opting to save themselves a weekend or two during the holiday season without forgoing the festive home decorations that make the season special, by looking to professionals for holiday home lighting help.

Anteater Pest & Lawn can help by designing a holiday lighting plan tailored specifically for your home. The company will then install the holiday lighting system using top-rated equipment. At the end of the holiday season, Anteater will return to your home, take down, pack and store lights in your attic --ready for installation next year.

Anteater's holiday lighting services include:

Lights: We light up your home with large C-9 or small mini lights depending on application. We install lights with all-in-one (gutter or shingle) clips and power them with heavy duty 15 am outdoor timers. For neatly outlined yards we mount C-9 lights on durable plastic yard stakes.

We can also:

- Outline fascia, windows, doors or archways
- Decorate trees, shrubs, mailboxes and line your driveway
- Post-Holiday un-install including a "map" of where the lights attached and storage box for your attic or closet

Decor: To bring more holiday cheer outside your house, Anteater can accessorize your home with our new lighted artificial "Oregon Fir" wreaths and garlands, finishing off the wreaths with beautiful red bow accents.

How to get holiday lighting set up in your home today:
