

AVnex Gives Out Free First Version of Video Karaoke Maker

Avnex Ltd., October 30, 2007

URL: <http://www.pr9.net/comp/development/6658october.html>

AVnex has officially announced the release of AV Video Karaoke Maker version 1.0. This newbie software is given out for free at <http://dvd-player.audio4fun.com/video-karaoke-maker.htm>. AV Video Karaoke Maker is a standalone karaoke mastering tool for home karaoke enthusiasts.

PR9.NET October 30, 2007 - Cy, Cyprus - Dedicated to making Karaoke files, the software is able to create karaoke files from video, audio and even images in many different formats. It supports users by creating and editing a karaoke file; importing sound and lyrics, videos/static backgrounds from different formats; synchronizing lyrics and sound; and by previewing and exporting the karaoke project to different video formats (with many different video and audio codecs).

As soon as the user inputs their files, they can quickly create their own karaoke file. The interface is split into two panes, one displays sound file and the other for text, AV Video Karaoke Maker allows user to drag the words into the waveform chart in order to synchronize the lyrics with the sound. You can zoom in or out on the sound spectrum view to adjust and view your sounds and texts, change the font type and size, even text colors and position. When finished, you can export your completed file into either of the two most popular video types: AVI and WMV.

This is the third free product that AVnex has launched, following their Digital Talking Parrot screen saver and MP3 Player Morpher. "Our Digital Talking Parrot screen saver received a 3 out of 5 star rating at Download.com, and the MP3 Player Morpher, which was updated in May this year, reached nearly 600,000 downloads and a 4 out of 5 star rating. "We are happy to know that our products are useful to everyone, and hopefully this new free Video Karaoke Maker will be warmly received as well," said Helen Le, Marketing Manger of AVnex Ltd.

AV Video Karaoke Maker is compatible with Windows Vista and its predecessors. The free version has no limitations, but requires a free key to activate it. You can try it right away at <http://dvd-player.audio4fun.com/video-karaoke-maker.htm>
