Leading online storage tank supplier TankDepot.co.uk, can now offer BioDiesel users a comprehensive choice of purpose designed tanks from market leading manufacturers, for the safe, secure and environmentally responsible storage of BioDiesel Grades B5 to B100.

PR9.NET November 03, 2007 - DERBY, UNITED KINGDOM: With the launch of Harlequin's new range of purpose designed BioFuel Stations at the recent BioDiesel Expo in Newark, Nottinghamshire – leading storage tank supplier TankDepot.co.uk now offers a complete range of fully bunded, Storage and Dispensing Tanks for BioDiesel Grades from B5 to B100.

Launched to widespread acclaim in 2006, Harlequin's Fuel Point range is available in a choice of 1,400 litre and 2,500 litre capacities. Supplied complete with 240 volt pump, 4 metre delivery hose, factory fitted dipstick and automatic nozzle – Harlequin Fuel Points are ideal for the onsite storage and dispensing of BioDiesel Grades up to B5.

Harlequin's Fuel Station range builds upon the success of the Fuel Point range and adds a host of added-value 'extras' as standard, including 'plug and play' electrical connections; a choice of 12, 24, 110 or 240 volt pump; 10 micron fuel filtration; failsafe overfill prevention capability and electronic contents gauge. Additionally, two additional capacities are added, courtesy of a 5,000 litre and a super-sized 10,000 litre model.

Both 5000 and 10000 litre Fuel Stations are supplied complete with extended 6 metre delivery hoses and an 80 user fuel management system is available as an extra cost option. Just like the Fuel Point range, Harlequin's Fuel Station is fully bunded and is suitable for BioDiesel Grades up to B5.

Also available for B5 BioDiesel storage is Titan's market leading Fuelmaster range. Every Fuelmaster is supplied complete with a choice of 12, 24, 110 and 240 volt pump, fuel delivery hose, automatic trigger nozzle, Watchman Plus proactive tank and bund monitoring system and incorporates fully bunded construction. The Fuelmaster range is available in a choice of inherently useful 1300 litres, 2500 litres, 3500 litres and 5000 litres capacities.

For customers wishing to store BioDiesel Grades up to B30, TankDepot.co.uk suggests Titan's range of BioMaster 30 Bunded BioDiesel storage and dispensing tanks, launched earlier this year. Manufactured from heavy duty polymers, the BioMaster 30 range has been thoroughly tested and is approved for the storage and dispensing of BioDiesel up to B30 Grade.

Finally, for BioDiesel Grades over B30 and up to B100, TankDepot.co.uk can offer Harlequin's all-new BioFuel Station range. The first of a new generation of tanks, every BioFuel Station is manufactured from a unique, BioDiesel resistant plastic that is the result of an intensive, pan European development programme. Fully bunded and sharing a similar specification to Harlequin's Fuel Station range, every BioFuel Station incorporates wetted components which are guaranteed suitable for long term exposure to even the highest concentrations of BioDiesel, manufactured in accordance with British Standard BS EN14214.

Irrespective of manufacturer, model or capacity chosen, every BioDiesel Storage and Dispensing Tank is fully compliant with the most demanding UK and European requirements including The Control of Pollution (Oil Storage) (England) Regulations 2001.

In addition to the supply of BioDiesel storage and dispensing tanks, TankDepot.co.uk can also supply a complete range of over 200 tanks from both Harlequin and Titan, for the safe, secure and environmentally responsible storage of agricultural fuel oil, heating oil, potable water, non-potable water, waste oils and lubricants.
