American Metal & Technology (Stock Symbol: AMMY), a leading manufacturer of high precision investment casting, machined parts and electronic circuit boards in the People's Republic of China ("PRC"), obtains additional orders of \$1.6 million, including orders worth more than \$200,000 from new clients in the United States.

PR9.NET November 07, 2007 - LOS ANGELES, CA - American Metal & Technology, Inc. (OTC BB:AMMY), a leading manufacturer of high precision investment casting, machined parts and electronic circuit boards in the People's Republic of China ("PRC"), announced it has successfully obtained new sales orders for high precision machined products from customers in Europe and the United States for an aggregate value of approximately \$1.6 million dollars. Of the \$1.6 million, \$1.36 million was from three of the Company's previously established customers: a French brewery equipment distributor, a German food and beverage equipment distributor and a European equipment and parts distributor. The balance of \$240,000 came from two new clients in the United States.

Chen Gao, President & CEO of American Metal & Technology, stated, "The recent orders are a testament that our business plan is working. Anytime we get repeat orders of this magnitude we know that we have gained a considerable amount of trust from our customers. Our customers have seen the quality of our work and have confidence in us to continue helping them grow their businesses. The two orders from new customers in the United States are also encouraging. Becoming a public company in the United States has helped us gain the attention of more North American businesses."

American Metal & Technology is capable of producing machined parts with dimensional tolerances within +/-0.015", measurement of circular run-out tolerance around 7.6 microns, and up to +/-0.5 ∘ of special angle tolerance and Ra1.6 - Ra 3.2 ∘ in surface roughness.
