

A review of AV Voice Changer Software after 6 years on the market

Avnex Ltd., November 13, 2007

URL: <http://www.pr9.net/comp/development/6746november.html>

Having reached over 5 million downloads, including 1.3 million downloads from download.com, AV Voice Changer Software from Avnex Ltd has established a worldwide community and is now known in more than 70 countries. More information can be found at www.audio4fun.com . First released in early 2001, AV Voice Changer Software was almost the first product to be known in the market dedicated to voice changing at that time. Its main function is to change the voice, based on its timbre and pitch, in real time.

PR9.NET November 13, 2007 - Cyprus, Cy, Nicosia-"It took us a long time to make the product, and a adequate time to bring its into the public", said Helen Le, Marketing manager of Avnex, who has accompanied the development of the product from the very beginning, "and we are looking for more prospects for the product in the future."

6 years is not a very long time in a product lifetime, but not a short period either. Voice Changer Software 1.0 was simply able to change the voice; now the software has been divided into 3 different editions: Voice Changer Software Silver, Gold and Diamond, featuring four different levels of usage, from fun use online to professional uses.

Voice Changer Software Silver (or popularly known as aVoice Changer Software) is a light tool for voice changing while online, such as in chat rooms or online games. Voice Changer Software Diamond is the heart of the product line. It is the integration of three big functions: voice changing, voice imitating and background effect making. With this exclusive software, no longer do users need to jump from one software to one another to completely manipulate a voice-related audio file.

The software has received a 4.5 star rating from download.com members. "We're glad to know that our product is still well liked by the online community, and we promise to bring more features and benefits to our valued users," said Le.

If you are in need of a voice changer tool, for whatever purpose, take a look on www.audio4fun.com for one of the most reliable voice changing products.
