The online business-to-business trade portal, Worldwide Industrial Marketplace has launched a new buying guide designed to connect buyers and suppliers of industrial springs throughout Asia and the Middle East.

PR9.NET January 04, 2008 - Westborough, MA - Donald LaBelle Associates, publisher of the Worldwide Industrial Marketplace, a division of IndustrialLeaders.com, announced today the launch of its new industrial springs directory and buying guide. According to Kelly Mayo, a spokeswoman for the company, the new publication will serve as an on-line resource to help companies throughout Asia and the Middle East locate manufacturers and distributors offering a broad range of springs for industrial, engineering, technical, plant maintenance and various manufacturing applications.

The new Industrial Springs Directory includes offerings for a wide variety of springs such as coil, spiral, compression springs, box, flat, extension springs, torsion, conical, precision, die, leaf, helical springs, metric, recoil, torque, fourslide springs, pre-stressed, mechanical, valve, clutch, spiral springs, hydraulic, custom and special springs as well as spring assemblies such as clips, washers, pins, wire, clamps, reel and bolts.

According to the company, most springs in the publication are available in dozens of materials, including stainless steel, plastic, copper, hardened steel, titanium, rubber, Inconel®, urethane and other materials as well as special coatings to protect from corrosion.

The new directory is located at

<http://www.WorldwideIndustrialMarketplace.com/directory/springs.html> and includes offerings from manufacturers, exporters and distributors serving markets throughout Asia and the Middle East, primarily but not limited to Hong Kong, India, Israel, Indonesia, Kazakhstan, Japan, Kuwait, Iran, Malaysia, China, Pakistan, Saudi Arabia, Philippines, Taiwan, Singapore, United Arab Emirates and Thailand.

"We are proud to provide such a useful buying guide for mechanical engineers, manufacturers, plant maintenance professionals and others that utilize springs for different applications," says Frank Wallace, Business Director of the Worldwide Industrial Marketplace. He added, "Whether you need springs to repair machinery, design equipment, manufacture technical devices or for virtually any other use, our directory will help you quickly find a suitable supplier to meet your requirements."

As one of the original partners of <http://www.IndustrialCOOP.com>, an international industrial-focused search engine, Wallace claims the Worldwide Industrial Marketplace (WIM) is used in over 54 countries by industrial suppliers and buyers to help them find potential trading partners. "Our growth has shocked quite a few people", says Wallace. "When we founded WIM four years ago I remember several Internet experts indicating our domain name (WorldwideIndustrialMarketplace.com) was too long for people to remember and therefore, warned us the site would probably fail. Look at us now," says Wallace with a grin of satisfaction.
