New package openers safely and efficiently cut through shrink wrap, string, ribbon and twine.

PR9.NET January 15, 2008 - Muskegon, Michigan - Safecutters Inc. (www.safecutters.com) has announced the addition of the Sleak Beak and Sleak Beak Dual Tool -- two new utility cutters to Safecutters' growing selection of high quality, affordable and safe cutters.

For \$3.45, the Sleak Beak has a film guide to easily start the cut on shrink wrap, plastic bands, string, ribbon and twine. This sturdy, long-lasting tool has replaceable blades.

At a price of \$6.95, the Sleak Beak Dual Tool is an all-purpose hook knife that cuts foam, stretch wrap, string, ribbon and twine. It's called Dual because of the retractable Tape Cutter for cutting most kinds of tape, as well as clamshell packaging and blister packs. The durable handle is high visibility yellow, impact resistant and is covered with an ergonomic black comfort grip.

As part of a special product launch, Safecutters is currently offering both products in a "Pair O' Beaks" package which provides 1 Sleak Beak and 1 Sleak Beak Dual Tool for just \$9.99.

"The introduction of Sleak Beak products has been met with much excitement," said Tom Fri, Safecutters President. "We've received several orders and some great feedback about the addition of these products. Customers should check back with our website frequently to stay up to date with our ever changing product line. At Safecutters, we believe in making utility, cutting and packaging knives as safe and useful as possible."

In addition to the new Sleak Beak products, Safecutters recently created the exclusive Safecutters Safety Set which gives a great deal on an important selection of safety tools, including 1 Sleak Beak; 1 Sleak Beak Dual Tool; 2 Klever Cutters for making hundreds of cuts safely; 2 Klever Koncepts with a wider cutting area and longer handle; and 1 set of Flaps Down, the simple, but oh-so-useful gadget for keeping the flaps down on a box while you load it.

Safecutters Inc. provides an online store of utility knife box cutters for opening shipping boxes and shipping packages, as well as safety knives to open moving boxes and packages. For more information about Klever Kutter and Klever Konzept and other Safecutters products, visit www.safecutters.com.
