*MatchHire applicant tracking and staffing software new features enables recruiters and HR Professionals to share important data and effectively hire the right candidate.*

PR9.NET January 16, 2008 - CHICAGO, IL – Avidweb Technologies Inc., a provider of recruiting and Applicant Tracking Systems (ATS), announced the release of its newest enhancement to its MatchHire Applicant Tracking Software. The additional functionality is designed to help enhance team collaboration and to quickly identify candidates with the right skills.

"The new feature "Information Sharing" is a direct result of our customer feedback wanting to increase collaboration across their company" said Yahya Abutaleb, CEO of Avidweb Technologies Inc., "the new feature will enable our clients to share selected folders and notes about candidates allowing key players across the enterprise to have instant feedback on candidates so they can fill position quickly."

MatchHire Applicant Tracking Software includes a number of effective new features and benefits designed to make sharing information about candidates easier and more intuitive. Users can share notes about applicants, create shared folders and grant different access privileges to colleagues and team members.

MatchHire delivers on demand and easy to implement recruitment solution that has many robust features to help manage the hiring process including resume parsing, posting jobs in real time, candidate and requisition tracking, emailing, scheduling, interviews, follow-up tasks and collaborating with associates and HR managers.
