Aztecsoft Limited, a leading provider of Global Software Engineering Services today announced that it has been recognized in the Global Services 100-2008 Listing.

PR9.NET February 06, 2008 - Bangalore/India - The Global Services 100 is an annual compilation of the world's most innovative service providers selected on the basis of a research study conducted by Global Services and neoIT, an outsourcing advisory firm.

Service providers from 17 countries, with delivery centers across 31 countries, comprised the list of participants across the IT and BPO industry, including IT application services, infrastructure, FAO, HRO and contact centers.

"Being listed in the Global Services 100 survey recognizes the ability of our company and our people to work successfully and deliver the best results for our customers in a competitive environment and is an external validation of our commitment to Excellence", said Samir Bodas, CEO, Aztecsoft Limited.

The Global Services 100, now in its fourth year, is a tool for buyers of business and technology services. Judges from Global Services magazine team up with outsourcing experts at neoIT, a consulting firm that specializes in services globalization, to identify and evaluate the leading service providers located on four continents. The evaluation is based upon data provided by the service providers and third parties regarding effective operations, service offerings, client relationships and human capital.

Using a scientific methodology the Top 100 list is compiled on the basis of responses from participants under four broad categories- Size (revenue, employee strength, geographies covered, etc.), customers (customer base, testimonials and references, average contract size, etc.), skills (depth and breadth of offerings, delivery capability, quality initiatives, verticals covered, etc.) and others (attrition, training, etc.) A weighted scoring scheme, designed by a panel from Global Services and neoIT's practice experts, is used to rate each question.

The complete results will appear in Global Services magazine, both in print and online, in February/March 2008.
