PR9.NET February 12, 2008 - Florence, KY - BlueStar, the leading innovator in solutions-based distribution for Auto ID, Point-of-Sale, RFID, and Mobility products, is announcing its distribution of Janam's XM60 Series mobile computer with Microsoft Windows® CE 5.0. This portable rugged device is designed for end-users in warehouse-management within the four walls.

Smaller, lighter, and far less expensive than comparable mobile computers, the rugged Janam XM60 Series includes a brilliant color, QuarterVGA display, Freescale™ MX21 processor, backlit numeric keypad, WLAN, and Bluetooth capabilities. Weighing less than 10 oz, the XM60 Series is sealed to IP54 standards and withstands multiple 4-ft/1.2-m drops to concrete across a wide temperature range. It also features a user-accessible mini-SD slot and high-performance barcode scanning with Adaptus® Imaging Technology.

"The XM60 delivers all the features today's business applications demand within the four walls of the enterprise at a price that makes sense," says Dwight Ogletree, VP of Sales for Janam Technologies. "It is an ideal blend of performance and value, and we're pleased that BlueStar has quickly positioned itself to bring this cost-effective Windows® CE solution to their customers and ISV partners."

"BlueStar is excited about carrying the new XM60 mobile computer that is priced right to make a big impact in the Windows® CE Environment," says Robert Urben, Janam Business Development Manager for BlueStar. "The addition of the Windows® CE solution to Janam's well-known XP20 and XP30 PDA solutions opens up a whole new group of end-users to the Janam product line."
