Recognized as Top 100 IT outsourcing companies from around the world

PR9.NET February 12, 2008 - Hyderabad, India; Philadelphia, USA; London, UK; Wednesday, 6 February, 2008: AppLabs, the world's largest independent testing, quality management and certification solutions company, today announced that AppLabs has made it to the Global Services 100-2008 list. The list brought out by Global Services and neoIT, recognizes Top 100 companies from around the world in 10 categories including service-delivery areas such as IT Services, Customer Care and Business Process Outsourcing. The list represents companies who have the maturity and capability to lead the next wave of services globalization. This recognition places AppLabs amongst leading providers of IT outsourcing and BPO services worldwide.

"AppLabs' end to end services portfolio in testing, quality management and certification and leadership position in testing services has helped being part of Global Services 100. This is a great achievement for over 2000 AppLabsees globally." said Makarand Teje, COO & President, AppLabs.

"The Global Services 100 list, brought out by Global Services and neoIT, has grown to be a highly credible listing of global IT services and BPO companies. The list helps service buyers' leapfrog the request-for-information stage and the category winners almost always make it to the RFP stage in a service deal. That's the unique advantage a Global Services 100 company enjoys," said Ed Nair, Editor, Global Services.

A team of senior editors at Global Services along with outsourcing experts at neoIT, a consulting firm focusing on services globalization, evaluated the online entries to identify the leading service providers located in four continents. The evaluation was based upon the data provided by the service providers and third parties with reference to effective operations, service offerings, client relationships and human capital. Winners were selected in each of 10 categories in service-delivery areas from Eastern Europe, Asia and Latin America.

###
