Ni Enterprise Manager nominated for prestigious SC Award Europe.

PR9.NET February 13, 2008 - Glasgow, UK - Netintelligence is delighted to announce that it has been shortlisted as a finalist at this year's prestigious SC Awards Europe. The company's flagship product, Ni Enterprise Manager, has been included in the Best SME Security Solution category.

This is the second successive year that Ni Enterprise Manager has been recognised as a finalist at the awards, and Netintelligence is hoping to emulate its success of last year when Ni Enterprise Manager was named Best Security Management Service.

Ni Enterprise Manager is one of several web based software as a service (SaaS) solutions that Netintelligence offers. .

Phil Worms, Netintelligence's Director Product & Marketing, said: "We are extremely pleased to have received this nomination, particularly in the SME category. As a web based service, Ni Enterprise Manager really does bring tangible benefits to this market sector, in addition to the comprehensive security aspects of the service it also delivers tangible cost and resource savings. Which given the current economic climate is as important to a business as the ability to prevent Instant Messaging operating on its network!"

The SC Awards Europe are widely considered the most prestigious awards programme in the information security industry and stand out as a true benchmark of achievement. Now in their thirteenth year, the Awards have a long-standing tradition of promoting excellence.

Paul Fisher, Editor, SC Magazine UK, commented: 'I congratulate all those businesses and individuals who have been short-listed and look forward to welcoming them to the Awards night in April'.

The 2008 Awards presentation will be held on 22 April at the Hurlingham Club in London.
