

Engate Technology Awarded 2008 Hot Companies Honor

Engate Technology Corporation, February 25, 2008

URL: <http://www.pr9.net/comp/science/7428february.html>

Engate Technology Corporation, a leading anti-spam supplier and pioneer of next generation network profiling and connection management security solutions, today announced that it has been named a recipient of the 2008 Hot Companies award by Silicon Valley Communications. Selected from an industry analysis of more than 500 prominent info security vendors around the world, this prestigious honor comes to Engate Technology based on a selection criteria of Products, People, Performance and Potential behind the company's growing success.

PR9.NET February 25, 2008 - San Jose, CA - "This award underscores Engate's continued success in helping organizations around the world to secure their networks from dangerous messaging abuse such as spam, phishing and botnet attacks," said Rake Narang, Editor-in-chief, Info Security Products Guide. "Engate has demonstrated a successful track record in helping their customers stop threats at the network layer before spam and malicious payloads compromise IT and administrative resources. With Engate's product innovation and growing list of customers, they are well positioned to expand their leadership in the anti-spam security market."

According to Silicon Valley Communications, the Hot Companies 2008 selection helps raise the bar significantly for others in the industry to provide end users with effective and deployable protective solutions against the next generation of highly sophisticated and converged attacks. The evaluation process also included strong entrepreneurial spirit, seasoned executives with relevant experience, clear understanding of the security market, products and solutions that are positioned to take advantage of the emerging market opportunities, well developed revenue-growth model and clearly planned expansion strategies. Engate is strategically poised to capture new market share globally via customer wins and competitive conversions. Additionally, Engate secured its place on the list based on its proven ability to deliver over 99% anti-spam accuracy at the network layer for its enterprise customers, OEM partners and resellers.

Inclusion in the 2008 Hot Companies list follows other recent honors received by Engate Technology, including:

- Best Startup Corporation in 2008 by Info Security Products Guide
- Product of the Year Award by Customer Interaction Solutions Magazine in 2007
- Excellence in Anti-Spam Finalist by Silicon Valley Communications in 2007
- Product of the Year Award by Communications Solutions Magazine in 2007
- Product of the Year Award by IT Magazine in 2007

"It's gratifying to see that Engate's Network Profiling Anti-Spam solutions have not only been widely accepted by enterprises around the world, but it continues to win award after award among respected industry followers," said Wil Cochran, president and CEO, Engate Technology. "Being named a 2008 Hot Company by Silicon Valley Communications is a significant third-party endorsement for Engate as it further validates our leadership position and the value we bring to our customers, resellers and OEM partners as they've come to rely on our next generation anti-spam solution to successfully stop threats at the network layer before spam and malicious payloads inflict damage to their network."
