StatMedica adds a new dental clinic in Wasraw to its portfolio.

PR9.NET March 08, 2008 - London - StatMedica, the British-Polish medical tourism partnership that has established an excellent reputation with British patients seeking dental and medical treatment in Poland, has added a new dental clinic in the outskirts of Wasraw to its portfolio.

StatMedica's Warsaw-based management team takes a number of factors into consideration before appointing a new dental partner. These include competitive pricing, however high quality and the dental surgeon's ability to speak English are also a priority.

Speaking from StatMedica's Warsaw office, Managing Partner Lukasz Liese explains: "There are a number of aspects that we take into consideration before adding a new clinic to our portfolio. We frequently have to turn clinics away that do not meet our high standards. StatMedica understands the needs of dental patients from the United Kingdom. We are confident that we have selected clinics that have high standards, yet offer competitive prices at the same time."

StatMedica is now able to expand on its ability to offer high quality dental care at some of the most competitive prices in Europe, with dental implants starting at GB£ 480, crowns starting at GB£ 200 and veneers starting at GB£ 250. These prices are approximately 70% less than the typical price of treatment in the United Kingdom.

An extensive network of low-cost flights from cities across the United Kingdom to destinations across Poland and affordable hotel accommodation in Poland ensure that significant cost-savings can be made by travelling to Poland.

Alison Hope, director of StatMedica's London office said, "The cost savings that can be made by travelling to Poland for dental treatment are immense even once you factor in the cost of flights and accommodation"

StatMedica assists patients in selecting a suitable clinic, and can provide local support in Poland: from translation and interpreter services to 24-hour care by a qualified healthcare professional. Patients looking to find out more about surgery in Poland are advised to consult StatMedica.com the portal dedicated to private healthcare in Poland or to contact Alison Hope on +44 780 571 5527.
