Kernel Lotus Notes to Outlook Update introduced with many useful features for administrators and users. Now convert domino server mailbox accounts easily.

PR9.NET April 08, 2008 - New Delhi – India, Nucleus Data Recovery.Com Pvt. Ltd. today announced software update for Kernel Lotus Notes to Outlook software. The software update includes many new features and improvements to the previous software version and now runs on version 8.03.02.

With the Kernel Lotus Notes to Outlook update 8.03.02, users/administrators can now convert .NSF file to .PST file more efficiently and directly connecting with Lotus Domino server too. NSF to PST conversion is now fast with complete preview of the converted email data in free to evaluate version. Software algorithm for conversion is now quicker and allows users to save the converted .NSF file in .PST and Exchange Server format. The step by step guidance provided with in the software helps users in every step of conversion.

Software Features:

Kernel Lotus Notes to Outlook update 8.03.02 to convert NSF file to PST file is available for free evaluation and supports every flavor of Lotus Notes, MS Outlook, Lotus Domino Server and MS Exchange Server for migration and conversion process. The seven essential features of Kernel Lotus Notes to Outlook Update include the following;

1. Convert NSF file to PST file

Kernel Lotus Notes to Outlook Update now uses quick algorithm for nsf to pst conversion and quickly converts the files. The single and multiple .NSF file conversion options, lets users to convert single and as many files at a time.

2. Convert Domino Server Mailbox file(s)

Kernel Lotus Notes to Outlook Update is now more helpful for system administrators. Administrators can directly get connected with Domino server, select and list users' accounts and convert them to .PST or Exchange Server.

3. Save in .PST or MS Exchange Server format

Kernel Lotus Notes to Outlook Update is added with a new saving option of the converted files; Exchange Server format. Users can save the converted .NSF file in user mailbox of MS Exchange Server profile(s) and then view email and other items with that particular user account.

4. Save in Text and RTF format

Kernel Lotus Notes to Outlook Update helps users to save the converted files with Plain Text or RTF format where former do not preserves formatting of email text and latter preserves.

5. Convert Every Item

Kernel Lotus Notes to Outlook Update does not spares anything. It successfully converts every email, image, attachment, contact, calendar, appointments, journal, to-do item list, sent mails, drafts, alarms, rules, group calendars, created categories, and every other folder which is created in the NSF file.

6. No Size Limit

Convert .NSF file of any size easily. No constraint is applicable for Kernel Lotus Notes to Outlook Update.

7. Supports Every Version for Conversion

Kernel Lotus Notes to Outlook Update supports every version of required elements for conversion: Lotus Notes, MS Outlook, Lotus Domino Server and MS Exchange Server.
