Nova Pain & Rehab is committed to providing their patients with comprehensive care with a team-oriented approach that has been known to relieve pain in just a matter of a few visits. They are currently offering a special offer to their patients by visiting their website and printing out the special offer page.

PR9.NET April 22, 2008 - Arlington, Virginia – Nova Pain & Rehab offers the most comprehensive care when it comes to relieving pain associated with injuries. This has been made possible by combining expert medical advice with the highest chiropractic care that is available.

This state-of-the art rehabilitation program in addition to the dynamic team approach has proven to either significantly relieve pain or completely eliminate it in just a few visits. This can be pain associated with headaches, neck and back pain, arm and leg pain, carpal tunnel, sciatica, tennis and golfers elbow, fibromyalgia, sports injuries, and auto and personal injuries.

Gwen, a patient of Nova Pain & Rehab says, "When I began my physical therapy in June, I was pretty broken up and in pain. Through the services of the Rehab Center, I received quality care and information that helped me recover and set more attainable goals with my physical activities."

That is what Nova Pain and Rehab strives to do with customers: Helps their patients reach their goals when engaging in physical activities that can range anywhere from simply being able to move an arm all the way to being able to walk. And to make these goals more attainable, they accept a number of different insurances and they even offer their patients the opportunity to save 15% on their nutritional supplements and other products and services that are available in their office. All it takes is a visit to their website at www.novapainandrehab.com to find out how that discount can be obtained.

It is through their combined experience of the entire staff in their four locations in Arlington, Va., Alexandria, Va., Chantilly, Va., and Clarendon, Va., that patients notice a difference in how they physically interact with the world around them. Just take it from Doug, another patient of Nova Pain and Rehab. He says he enjoys the center because of a "Caring staff. Excellent knowledge of physiology and biomechanics. Holistic approach ties it all together. They're also a lot of fun."

If you would like to know more about Nova Pain and Rehab, please visit www.novapainandrehab.com and see first-hand how Nova Pain and Rehab can help you reach your physical goals both small and large.
