National architectural firm focusing on timber frame design, structural insulated panels and sustainable living, incorporating green design practices with alternative energy systems hires new Marketing Director.

PR9.NET April 24, 2008 - Claremont, NH - Kimberly and Jeremy Bonin of Bonin Architects & Associates, PLLC, (<http://www.boninarchitects.com>), a national architectural and project management firm specializing in timber frame design and green building, are pleased to announce the addition of Jackie Lampiasi as Marketing Director.

A graduate of Katharine Gibb School (now Gibbs College) in Boston, Jackie has over thirteen years' experience in the timber frame and log home industries, including the last four of her eleven years as Marketing Director for a national timber frame manufacturer. Her accomplishments there include getting over twenty timber frame homes featured in national and regional magazines, coordinating timber frame seminars and open houses nationwide, and submitting homes for numerous awards. She also wrote an article on the types and energy efficiency of Structural Insulated Panels for Environmental Design & Construction magazine, as well as timber frame newsletters focusing on design, materials, and correct application techniques distributed to over 3000 readers quarterly.

"Consumers are interested in building the cleanest, healthiest homes they can. At the same time, they are very conscious of their budget and want the most for their money," Lampiasi stated recently. "I'm thrilled to be working with an architectural firm whose top priorities are their clients and the environment."

Jackie's responsibilities will include keeping the company's website and blog (timberframeblog.blogspot.com) up-to-date and full of timely information, designing company literature, and partnering with businesses to conduct timber frame and green building seminars.

"Not only have I known Jackie professionally over the past five years," Kimberly Bonin said, "Jackie has become one of my closest friends, and I am honored to have her as an integral part of our business. She is an asset to our company with her wealth of knowledge in the timber framing and SIPs industry, and she continues to strive to attain as much information as possible about sustainable design technologies."

"Having Jackie's wealth of knowledge and 10+ years experience in the industry is an amazing asset to add to our company, Jeremy adds. "It is only outshined by her enthusiasm and outstanding attitude that she brings to work each day."

Jackie and her husband, Santo, have three children and currently operate Special Events Catering in Claremont, which also features handmade chocolates with customized wrappers.
